The instant claims are novel and unobvious over the prior art of record by claiming a pulse echo level measurement or ranging system that includes the creation of a correlation signal from the addition of a filtered received signal and a copy of the filtered signal shifted in time. Then, a correlation indicator is identified in the correlation signal. By repeating the above steps and selecting a maximum correlation as determined by the correlation indicators the echo distance travel time is determined.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
